# Errata Details

---

1. Description: balenaFin data sheet v0.0.4 states that the working temperature range is -25°C to 70°C. The real environmental working temperature range is 0°C to 70°C.  
Impacts: Whole board at low environment temperatures.  
Workaround: None.  
Resolution: The next revision of the data sheet, revision 0.0.5, will include a new specification for the valid temperature range.
