# 3) WiFi, BT, and BLE Co-location MPE

Note 1: BT radio, BLE radio, and WiFi radio are co-located, and transmit simultaneously.

Note 2: External antenna and embedded antenna do not work simultaneously.

Note 3: WiFi 2.4 GHZ and 5GHz radio do not transmit simultaneously.

Note 4: Worst-Case Co-location MPE is 2.4GHz Wi-Fi, BT, and BLE transmitting via external antenna simultaneously.

#### WiFi, BT, and BLE Co-location MPE Calculation:

BT = (0.0003/1) x 100 = 0.03% BLE = (0.0005/1)x100 = 0.05%

2.4GHz WLAN = (0.0122/1) x 100 = 1.22%

Total MPE Percentage = (0.03 + 0.05 + 1.22) % = 1.3% < 100%

The Above Result had shown that the Device complied with MPE requirement at 20 cm measurement distance.
